EDUCATION

Cornell University

College of Engineering | Master of **Engineering Management**

Ithaca, NY

Aug 2026 -May 2027

The Pennsylvania State University

College of Engineering | Bachelor of Science in **Computer Science**

Minor in **Engineering Leadership Development & Mathematics**

University Park, PA

May 2026

WORK EXPERIENCE

Penn State Advanced Vehicle Team

Project Manager

University Park, PA

January 2026 -Present

- Own end-to-end product delivery for competition vehicle HMI system and safety documentation, managing team hours, conducting weekly standups, and maintaining semester roadmap.
- Established agile workflows including sprint planning, progress tracking via Monday.com, and weekly integration meetings, improving cross-team visibility and keeping project on track to complete deliverables 2 weeks before final competition deadline.

College of IST

Project Manager & Data Analyst

University Park, PA

May 2025 -November 2025

- Managed AI literacy research to examine how students' prompt-engineering abilities evolve in the "Intro to AI & Art" course, analyzing pre- and post-instruction tasks delivering findings that showed clear improvements in prompt effectiveness.
- Built a task tracker for a 12-member cross-functional team, improving task completion rates and keeping deliverables on schedule.
- Assessed growth in students' prompt engineering skills through quantitative and qualitative analysis of prompt-response data, demonstrating measurable improvements across five key effectiveness criteria.

College of Engineering

Undergraduate Research Assistant

University Park, PA

April 2024 -August 2024

- Brainstormed innovative ideas to advance the research in sentiment analysis that developed a dual-stage approach combining open and closed vocabulary strategies for depression detection.
- Introduced and tested the EMPATH framework as a more cost-effective alternative to LIWC (Linguistic Enquiry and Word Count) for sentiment analysis, potentially saving the research team in software expenses.

Kalmane Tech

IoT Intern

Bangalore, India

Summer 2023

- Developed and executed a comprehensive plan to implement 9 password-protected IoT dashboards for biogas plants using the open-source IoT platform ThingsBoard, resulting in improved monitoring and control of 6 biogas plant operations.
- Utilized real-time data from biogas plants to implement an alarm system that triggered real-time email notifications whenever data values exceeded predefined thresholds, reducing response time and preventing potential equipment damage.
- Implemented an automated end-of-day report feature in the IoT dashboard, providing users with detailed insights on plant performance and facilitating data-driven decision-making.

LEADERSHIP EXPERIENCE

Indian Culture and Language Club

Vice President

University Park, PA

April 2024 -May 2025

- Acted as the main point of contact for 23 club members, handling all inquiries, resulting in an improvement in member satisfaction.
- Planned and executed a full-scale cultural event featuring 3 prominent Indian artists, drawing an audience of 600+ students.
- Built partnerships with 5 campus clubs, leading to 3 successful joint events over the academic year.

Airport Cooperative Research Program

Product & Research lead

University Park, PA

August 2023 -December 2023

- Led stakeholder research and prototype design to integrate electric aircraft batteries into airport infrastructure, enabling rapid swapping and reducing turnaround time.
- Collaborated with a 5-person team to build a real-time IoT dashboard, improving efficiency and enabling proactive maintenance.

SKILLS

- Technical - Python, Java, C, Git, ThingsBoard, Data Structures & Algorithms, Object-Oriented Programming, MS Office
- PM - Project Libre, Jira, Notion, Strategic Planning, Problem-Solving, Communication skills, Go to market, Figma
- Research - Academic writing, Design-based research methodology, Data Analysis
